

Meeting the demand for ^{MORE} energy savings.

NEW
energy saving
feature

Built-in energy monitoring
measures energy use in
kilowatts - by the hour, 2 hours,
4 days, 3 weeks or monthly.

The new Haverland TT with built-in energy monitoring!

Haverland TT has always been based on an amalgam of built-in, energy saving features working in unison to maximise energy use.

Now, we have added built-in energy monitoring too!

Haverland's market research showed that when consumers can actually see their real time usage levels, they invariably reduce energy consumption without compromising thermal comfort.

This development follows Haverland's 'Drop One Degree' eco initiative last winter, when a major international financial services group instructed their Facility Managers to reduce radiator temperature settings by just one degree at their corporate HQ. This simple task enabled the high profile company to save several million Euros on energy costs.

This refinement, used in conjunction with Haverland's high precision, energy management and control systems now enable consumers to save even more on energy costs!

Built-in energy saving features

- 'State-of-the-art' energy management system
- High precision, electronic chrono-thermostatic control
- Zone by zone heating control
- Digital programmer with 8 tamper-proof heating schedules
- Enhanced radiant performance

And now

- Built-in energy monitoring
- **MORE ENERGY SAVINGS!**

Applications:
**Houses,
apartments,
shops,
offices, etc.**

Model RC 4 TT
500W
230V
447 x 580 x 100
Weight 11 Kg
4 Elements

Model RC 6 TT
750W
230V
606 x 580 x 100
Weight 15 Kg
6 Elements

Model RC 8 TT
1000W
230V
765 x 580 x 100
Weight 19 Kg
8 Elements

Model RC 10 TT
1250W
230V
924 x 580 x 100
Weight 23 Kg
10 Elements

Model RC 12 TT
1500W
230V
1083 x 580 x 100
Weight 27 Kg
12 Elements
