

The Herschel **Select XL Mirror** forms part of our high performance frameless Select XL range. It is ideally suited to both the commercial and domestic sector.

Select XL Mirror can be placed in humid areas such as bathrooms without any condensation forming on the glass, whilst also chasing away the causes of moisture that convection-based heaters actually encourage (hot air moving over a cold surface). Due to the infrared heating process, **Select XL** heats up objects in the room rather than the air. This helps to keep walls and furniture in humid areas warm, dry and free of mould.

In addition to being a stylish, energy-efficient addition to bathrooms, **Select XL mirrors** are popular for hallways, bedrooms and living rooms.

All units are made with Mirrored Safety Glass and manufactured from the highest quality materials under strict quality control and incorporate Herschel's COSIX® cell technology and innovative EASY-FIX mounting system.

The Select XL panels are specifically designed to be maintenance free and to last for many years. For this reason, and to enable accurate temperature control and efficiency, the panels do not have any in-built controls and must be used in conjunction with Herschel iQ controls or equivalent. This will also ensure full compliance with European energy saving regulation (ERP Lot 20).

TECHNICAL DETAILS

SURFACE:	ESG Glass with reflective Mirror coating
COLOUR:	N/A
HEATING ELEMENT:	Herschel COSIX® Cell Technology
REAR PANEL:	Aluminium with Herschel EASY-FIX System
FRAME:	Frameless
SURFACE TEMPERATURE:	App. 85°C - 95°C
VOLTAGE:	220-240 V, 50/60Hz
PROTECTION CLASS:	IP 45
CABLE:	2.5m power cable
INSTALLATION:	Wall mounted

WARRANTY: 5 years
(Refer to the warranty policy on Herschel-infrared.com for more detail including exclusions)

AVAILABLE MODELS

Model	Part No.	Dimensions	Weight	Rated Power	Heated Area
SELECT XL MIRROR	HS350-M	66 x 66 x 2.5cm	10.5kg	350W	6-8 m ²
	HS500-M	60 x 100 x 2.5cm	14.5kg	500W	9-12 m ²
	HS700-M	70 x 130 x 2.5cm	22.3kg	700W	13-15 m ²

The heated areas are an indicative guide only. The actual heated area will depend on the heat loss of the room which is influenced by many factors including construction type, external walls, window area and insulation levels. Always use the Herschel online calculator or contact your dealer or installer for an accurate specification.

The Select XL panel comes with one EASY-FIX mounting bracket. When installed, the front of the panel will extend a total of 5cm from the wall. The panel will radiate heat into the room and will perform best when mounted in a position free of any direct obstructions such as a sofa. The panel will need to be wired into the mains and this should be carried out by a suitably qualified electrician. Refer to installation instructions for full details.

6 REASONS WHY

- ✓ 100% natural
- ✓ Heats objects, not the air
- ✓ Less damp and mould
- ✓ Reduced energy use
- ✓ Maintenance free
- ✓ CO2 free when used with renewable energy
