harmoni

Digital electric heating system

Harmoni has over 30 years' heating experience and during that time we have built a reputation for providing quality products backed up by exceptional customer service and sound technical advice.

The Harmoni range offers energy efficient, intuitive and well-designed practical heating solutions with cutting-edge technology at the heart of every product. Our new Lugo+ & Deuro+ radiators and 100+ thermostat, with built-in Wi-Fi, can be controlled directly from any smart device wherever you are, at any time.

All Harmoni electric radiators are Lot 20 approved, which ensures we are ready for the current energy efficiency heating market.

Whatever your requirements or the size of your room, we have a solution to fit your needs. We offer a FREE heating design service.

OUR OBJECTIVE IS TO REDUCE YOUR ENERGY CONSUMPTION, LOWER YOUR CARBON FOOTPRINT AND INCREASE THE COMFORT OF YOUR PROPERTY

THE HARMONI DIFFERENCE

Outstanding customer service

Our reputation has been built on exceptional customer service. We offer cost-effective solutions backed by expert advice and support, including free design and heat loss calculation services.

Quality products

All Harmoni products are designed and manufactured to our own demanding specifications. And with generous warranties, you'll be guaranteed a reliable, long lasting solution.

Clean, efficient energy

Harmoni heating products are clean and carbon neutral at the point of use.

Energy optimisation

By using the latest technology to manage their energy use efficiently, our heating products are able to maintain a comfortable, consistent warmth economically.

Easy installation

Electric heating solutions are generally easier and cheaper to install than gas or water systems.

Minimal maintenance

Harmoni heating installations don't require yearly checkups from certified professionals, just an occasional wipe over with a cloth.

HEATING DESIGN SERVICE 4

A free bespoke design service for your entire home. We can help you choose the best heating solutions for your needs and budget.

ELECTRIC HEATING 8

Stylish and efficient, our radiators and towel rails come in a variety of sizes and specs to suit any size or type of room. Wi-Fi options available.

UNDERFLOOR HEATING 18

A range of underfloor heating products to suit any project or budget. All Harmoni mats, foils & cables come with a Lifetime Warranty.

THERMOSTATS 26

Our range includes the Harmoni 100+ with built-in Wi-Fi, enabling underfloor heating to be controlled remotely via a smart device.

FROST PROTECTION 28

Frost protection kits are the perfect solution to stop external and internal pipes from freezing. Simple to set up and self regulating.

SPRAY FOAM INSULATION 30

Icynene® spray foam insulation really pays for itself, contributing to a reduction in heating and cooling costs.

HARMONI APP 31

Control your heating system from anywhere at anytime using a smart device. Works with Harmoni's Wi-Fi enabled products.

FREE
SERVICE

harmeni design

FREE bespoke design service for your entire home

A free design service to help you choose the best heating solution for your home and guide you through the entire process. And with our Wi-Fi enabled radiators and thermostats, we can design a smart connected heat system controllable from any smart device.

WITH YOU EVERY STEP OF THE WAY

We offer a range of heating products, but how do you know which one is best for your requirements?

Whether you're looking at heating options for a new build, a refurbishment, a new extension or simply reviewing your existing heating, we offer a comprehensive design service and can help you choose the best heating solution for your entire house.

And with our Wi-Fi enabled radiators and thermostats, we are able to design a smart connected heating system that you can control from your smart device, anywhere at any time.

Our team have a wealth of heating experience and can guide you through all the technical details – we can even liaise with your architect, builder or electrician – so you don't have to worry.

Take advantage of our free design service, call us for more information on 01473 559088 or email: sales@harmoniheating.co.uk

Some of the benefits of using our free design service:

- Full service from start to finish
- Expert advice from a qualified team
- Free bespoke design service
- Free heat loss calculation
- Best value quality heating products

Spray Foam Insulation
Icynene® spray foam insulation provides air sealing, which prevents heat loss, reducing energy bills. *Page 30*

Conservatory Radiator
Ideal for conservatories with low dwarf walls. *Page 11*

Frost Protection
A simple solution to prevent internal & external pipes from freezing. *Page 28*

Underfloor heating
A range of underfloor heating solutions to suit any project & budget (we also supply wet systems). *Pages 18–25*
Can be controlled remotely via a Wi-Fi thermostat *Page 27*

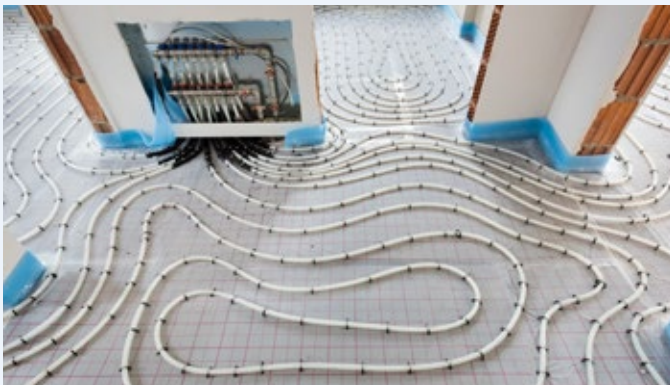

Towel Rail
The versatile towel rail warms towels, reduces moisture & mildew and heats the bathroom. *Page 16*

Digital Electric Radiator
A range of sizes, including Wi-Fi enabled models. *Pages 8–15*
See page 7 for radiator sizing

WET UNDERFLOOR HEATING

There are scenarios where a wet underfloor heating system is more suitable and economical to run. New builds, large areas and multiple rooms are all instances where wet underfloor heating would be ideal.

We can advise you if a wet underfloor system would be the best option and offer a free CAD design service. We also supply a full range of high quality wet underfloor heating systems and accessories.

FREE
SERVICE

radiator sizing

Sizing charts for all of the Harmoni radiator range

When choosing a Harmoni electric radiator system, correct sizing is important in order to achieve optimum warmth and maximise energy savings. To help you with the correct sizing, we have produced sizing tables as guidance.

FREE CALCULATION SERVICE

The sizing tables on page 7 will provide you with an estimate of the minimum size and quantity of electric radiators your room will require to establish and maintain a temperature of 21°C within the UK.

If you are unsure which size Harmoni radiator to choose, just call one of our experienced team and we'll work out the details for you.

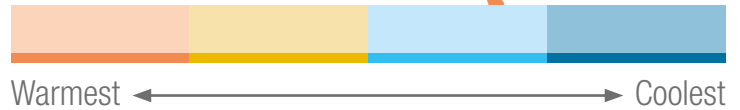

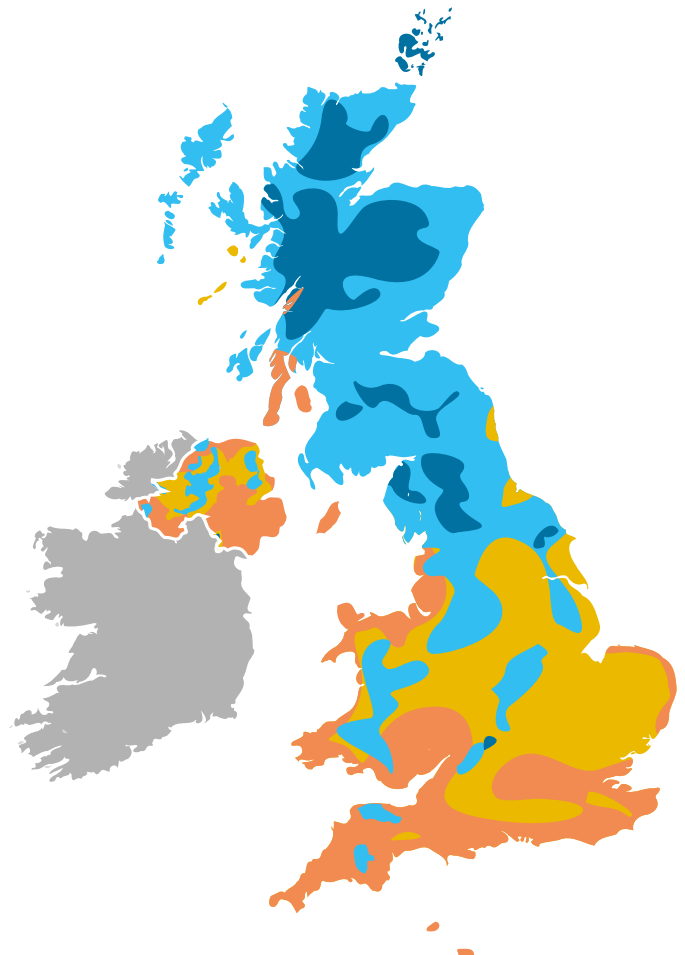

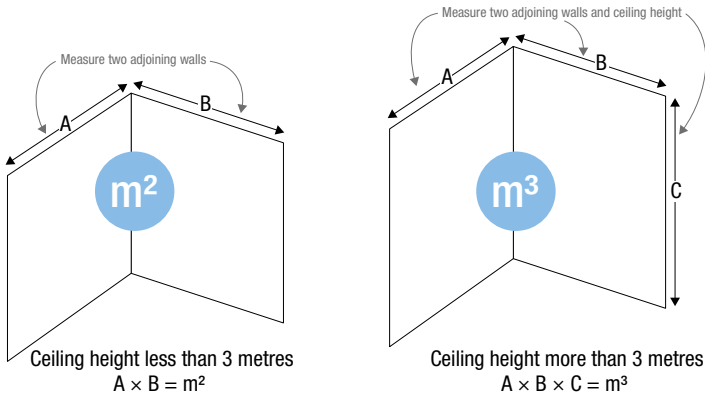

All you need are the measurements of every room where you would like to install electric radiators, if any of the walls are outside facing and the area where you live (*see the UK heat map on page 7*).

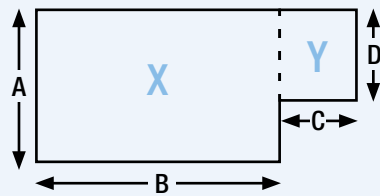

FOR A MORE
ACCURATE HEAT LOSS
CALCULATION, CALL US
ON 01473 559088

CALCULATE YOUR ROOM SIZE

1. If the ceiling height is less than 3 metres calculate the room size using metres squared (m^2), otherwise use metres cubed (m^3) if the ceiling height is more than 3 metres.
2. Refer to the map of the UK and note the colour in your area. The coolest parts are coloured dark blue and warmest parts are orange.
3. Look up the relevant sizing table below to find the correctly sized radiator for your room.

Non-square rooms

Measure the two squares separately then add the areas together.

$A \times B = X$

$C \times D = Y$

$X + Y = \text{Total area}$

harmoni lugo⁺

Digital electric radiator with 

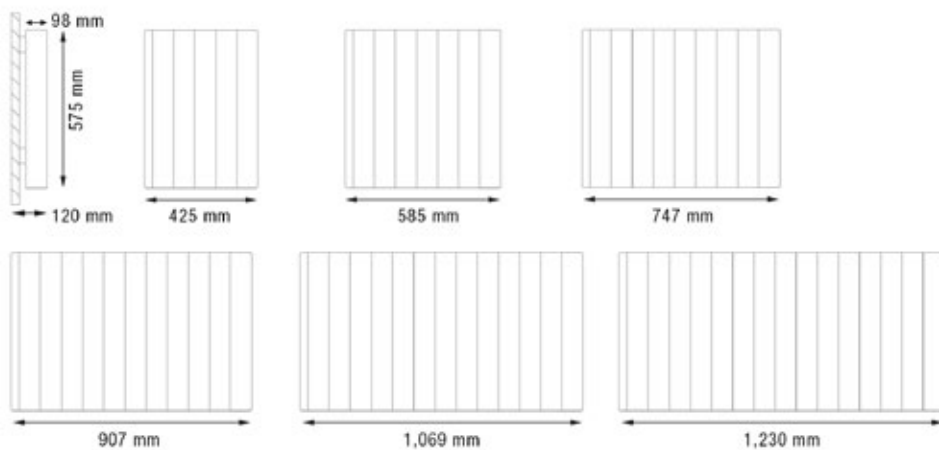

The premium range of Harmoni Lugo⁺ electric heating radiators includes integrated Wi-Fi, touch control panel with a high gloss finish, energy saving features and more. This intelligent radiator has a simple pairing method for easy control from smartphones anytime, anywhere. *See page 31 for details of the Harmoni App.*

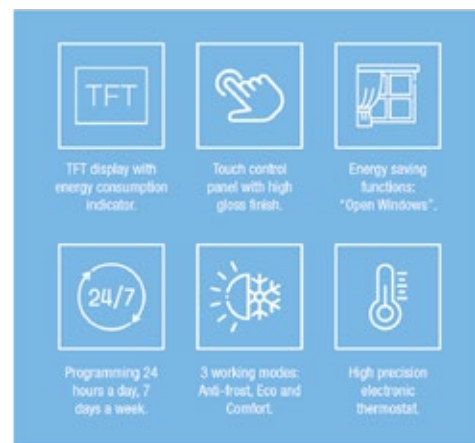

FEATURES

- Built-in Wi-Fi module integrated into electronics
- Bright screen with energy consumption indicator
- High precision electronic thermostat
- Armored steel resistance
- High purity aluminium
- White RAL 9016 finish
- “Open Window” energy saving function

- Template & installation kit included
- Protection grade: IP24
- 2004/108/EC electromagnetic compatibility directive
- 2006/95/EC low voltage directive
- 10-year warranty on the aluminium body and 2 years on the electronics

**CALL 01473 559088
FOR A FREE HEAT
LOSS CALCULATION**

The advanced Lugo+ range of radiators can be controlled using a smartphone, tablet or PC via the Harmoni App (See page 31 for details). The app gives you complete control over your heating system wherever and whenever you choose.

The high quality aluminium body also comes with a 10-year warranty.

harmoni underfloor heating

A range of underfloor heating systems to suit any project and budget

Electric underfloor heating emits a comfortable, even heat and is gaining popularity as a clean, energy efficient heating solution. Our underfloor heating range offers premium specifications at unbeatable value, backed up by exceptional customer service and lifetime warranties.

WHY USE HARMONI UNDERFLOOR HEATING?

We offer a premium electric underfloor heating range that offers unbeatable value.

- Best quality product at the lowest price
- Lifetime warranty on all products plus an installation replacement warranty
- Exceptional customer service
- Free next working day delivery
- Free fully-detailed quotation
- Independent S Mark & Fimko safety approved
- Free design service

Lifetime Warranty

All Harmoni mats, foils & cables are guaranteed against manufacturer defects for the lifetime of the initial floor covering.

Installer Warranty

Guarantees if you damage your Harmoni mat, foil or cable before the finished floor surface is installed we will replace it with an equivalent product free of charge.

HARMONI RANGE OF UNDERFLOOR HEATING SYSTEMS

A range of underfloor heating systems to suit any size project and budget. When used in conjunction with the Wi-Fi enabled Harmoni 100+ thermostat (see page 27), underfloor heating can be controlled directly from a smart device.

Harmoni Mat 100/150/200W

An ultra-thin self-adhesive heating mat designed for installation directly onto timber or concrete sub-based floors with minimal increase in floor height.

Harmoni Foil

An ultra-thin foil mat for laminate/wood floors. Fully earth protected.

Harmoni Flex

Suitable for retrofitting into existing builds with small or awkward shaped rooms such as a bathroom.

Harmoni Cable

A flexible solution for most new build applications, especially larger areas such as conservatories and sunrooms where heat retention is important.

FREE DESIGN SERVICE

A bespoke design is an essential requirement to maximise the performance and efficiency of the underfloor heating system. There is a huge difference in performance between an off-the-shelf and a fully designed solution.

Working out the intricacies of your underfloor heating project can be complicated, so let us give you a helping hand and design your electric underfloor heating system – and best of all, it's a free service.

- Full service from start to finish
- Expert advice from a qualified team
- Send us a drawing or plan and we'll produce a free fully-detailed quotation
- Get a free bespoke design

See page 4 for more details.

INDEPENDENTLY SAFETY TESTED

As well the required CE marking, all our mats, foils and cables are independently Intertek S Mark and SGS Fimko FI mark approved.

These marks are visual proof that our products are manufactured to the highest standards in safety and added assurance that there is no risk of a product safety failure.

SUPERIOR PRODUCT DESIGN

All Harmoni underfloor heating mats and cables are manufactured to the highest standards using quality materials and come with a lifetime warranty.

The backing mesh is made of strong, durable nylon with a self-adhesive backing. This allows for a quick, secure installation and avoids problems due to the mat floating or moving in the tile adhesive.

The heating cables are stitched to the durable backing mesh with a special

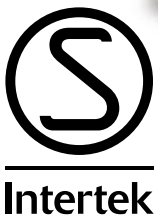

heat resistant thread. This ensures the element spacing remains uniform, guaranteeing an even distribution of heat and eliminates the opportunity for cold spots, which is a common problem with lesser quality mats.

FEATURES & SPECS

- Self-adhesive mesh
- Ultra-thin heating cable
- Twin conductor heating cable
- Suitable for most floor surfaces
- 100% aluminium earth sheaths

Cable thickness	3mm
Output	100W/m ²
Operating Voltage	230/240V
Cold tail connection lead	3m

harmeni mat

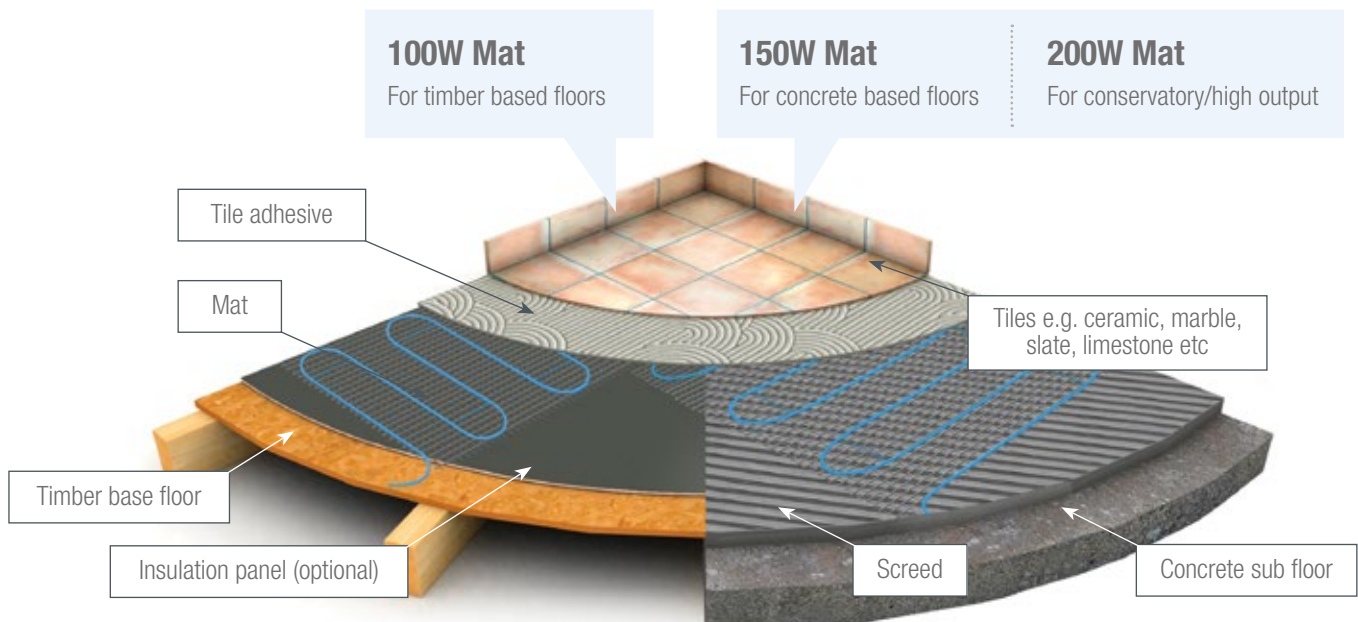

Ultra-thin underfloor heating mat – 100W/150W/200W

A self-adhesive heating mat designed for fast & efficient installation directly onto concrete sub-based floors with minimal increase in floor height. Consistent, even heat is achieved by pre-spaced heating cables. Our heating mats come with a Lifetime Warranty as standard.

APPLICATION

The Harmoni Mat range can be installed under ceramic, porcelain, slate and natural stone tiles.

When using laminate, engineered timber or vinyl floors a self-levelling compound should be used.

Independent S Mark Approval

The S Mark symbol shows that the product has been independently tested, ensuring your safety will not be put at risk by a product failure.

Intertek

The Harmoni underfloor heating mat has a self-adhesive backing mesh with a pre-attached ultra-thin twin conductor 3mm heating cable that ensures minimal increase to the existing floor height.

The enhanced product design ensures a speedy installation with an even heat across the complete floor surface, whilst allowing unlimited adjustment of the heating element to suit irregular formats.

When used in conjunction with the Harmoni 100+ Wi-Fi Thermostat, the underfloor heating can be controlled from a smart device (see page 27).

FEATURES & SPECS

- Easy to install
 - Twin conductor heating cable
 - Suitable for most floor surfaces
 - Can be installed within the thickness of tile adhesive
-
- Conductor: Twin
 - Output: 10W/m
 - Operating Voltage: 230/240V
 - Thickness: 4mm
 - Min. bending radius: 30mm

Intertek

harmoni flex

Under tile loose-laid cable

The Harmoni Flex loose-laid cable system provides a flexible and easy under tile heating solution for any floor size or shape. Flex is suitable for use beneath most floor types such as ceramic and porcelain tiles, limestone etc. Its thin heating element keeps floor depth to a minimum.

HARMONI FLEX

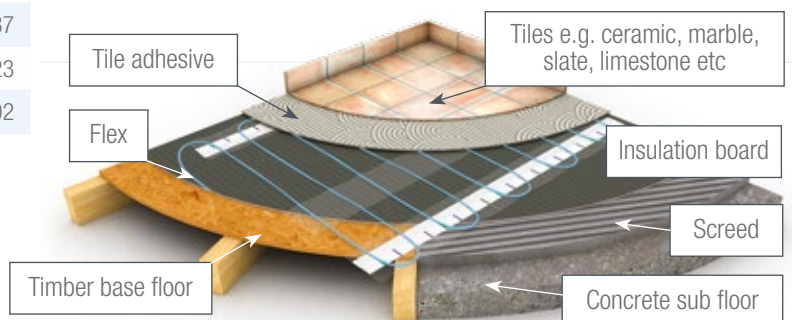

Select the Flex to suit your room coverage.
Then choose a thermostat (*see pages 26–27*).

harmoni cable

In-screed total heating solution

Harmoni Cable offers a flexible solution for most new build applications where a total heating solution is required. The cable installation allows variable power outputs to be installed with a maximum of 230 W/m², providing a total heating solution in most installation scenarios including conservatories and sun rooms.

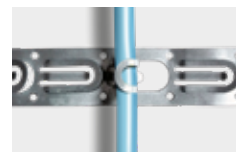

HARMONI CABLE

Select the Harmoni Cable to suit your room coverage. Then choose a thermostat (*see pages 26–27*).

THERMAL INSULATION BOARD

➔ For use with Mat & Flex

FEATURES

- Dimensionally stable, does not rot or warp
- Excellent resistance to moisture
- High level of thermal insulation
- Extremely light and easy to cut

The thermal panel is a lightweight insulated tile backing board developed specifically for use with tile floors. It consists of a polyfoam core with glass fibre reinforced polymer-modified cement faces, making it the ideal substrate for floor tiling and under tile heating systems.

APPLICATION

Thermal panels are suitable for both domestic and commercial use. Designed to be installed beneath both the Harmoni Mat and Flex, it provides a high level of insulation and a stable base for tiling (on timber based floors). Panels can be secured using ePanel fixings (when laying on timber floors), in conjunction with eMesh to strengthen the joints.

QF	Part Code	Dimensions (mm)	Coverage	Web Price (ex VAT)	Web Price (inc VAT)

XPS INSULATION BOARD

➔ For use with Foil

Specifically designed to provide a high level of insulation with poorly insulated concrete/screeded bases, the XPS board is constructed from extruded polystyrene, a durable, lightweight material with high compressive strength, giving it the ability to resist compressive creep and fatigue.

APPLICATION

Suitable for both domestic and commercial use, the boards should be installed beneath the foil mat in a brick pattern then secured along the joints using adhesive tape to prevent movement of the underlay during installation.

harmeni ❄️ FROST PROTECTION

Self-regulating frost protection kit

Trace heating kits are the perfect solution to prevent internal and external pipes from freezing. Our kits are easy to install and are self-regulating, which means the cable automatically adjusts to the ambient temperature and cannot overheat, only activating when the ambient temperature drops below 5°C.

- Pre-terminated trace heating cable
- Built-in thermostat
- Easy to install
- Independently SGS Fimko certified for extra safety

- Best price, best value
- Free next day delivery
- Free design service
- Free technical advice

EASY TO INSTALL

THE SIMPLEST SOLUTION TO PREVENT PIPES FROM FREEZING

APPLICATIONS

- **Boiler condensate pipes**
Stops boiler failures through frozen condensate drains
- **Outside tap protection**
Ensures your outside water supplies flow freely
- **Water pipe protection**
Prevents freezing of essential water supplies & drainage
- **Caravans and mobile homes**
Protects your water supplies from freezing
- **Stables and farms**
Eliminates problematic freezing of animal water supplies

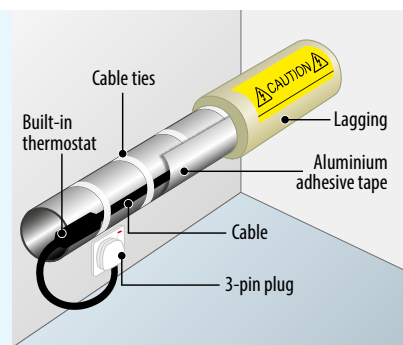

SIMPLY PLUG IN & GO

All of our frost protection kits come with a built-in thermostat which activates the trace heating cable when the ambient temperature drops below 5°C and remains operational until the ambient temperature climbs above 10°C. This also ensures that the trace heating system only operates when required to stop pipes freezing during the cold months, remaining dormant throughout the rest of the year. However, if there's a cold snap the trace heating will automatically reactivate until the weather gets warmer.

EASY INSTALLATION

A trace heating cable is generally quick and easy to fit, just follow the step-by-step instructions in the manual, although it is recommended to have the installation carried out by a qualified electrician.

HIGHEST SAFETY STANDARDS

As well as conforming to the requirements of the relevant European Directives, our frost protection kits are also independently SGS Fimko FI mark tested and approved.

This is visual proof that they are manufactured to the highest standards and added assurance that there is no risk of a product safety failure.

SPRAY FOAM INSULATION PROVIDES AIR SEALING, WHICH PREVENTS HEAT LOSS, SAVING YOU MONEY

harmeni insulation

ICynene® one-step spray foam insulation

ICynene is the pioneer of modern spray foam insulation. In addition to providing insulating and air sealing value, ICynene spray foam insulation works to help reduce heating and cooling bills as well as reducing the penetration of noise with its excellent sound dampening qualities.

BENEFITS OF ICYNENE® SPRAY FOAM INSULATION

- Lower your energy bill
- Environmentally friendly
- Prevent air leakage
- Reduce mould and condensation
- Prevent airborne pollutants and allergens
- Sound-proofing qualities
- Suitable for new and existing buildings
Increase the value of your home
- Improve damp protection
- No harmful gases
- Rodent and pest proof

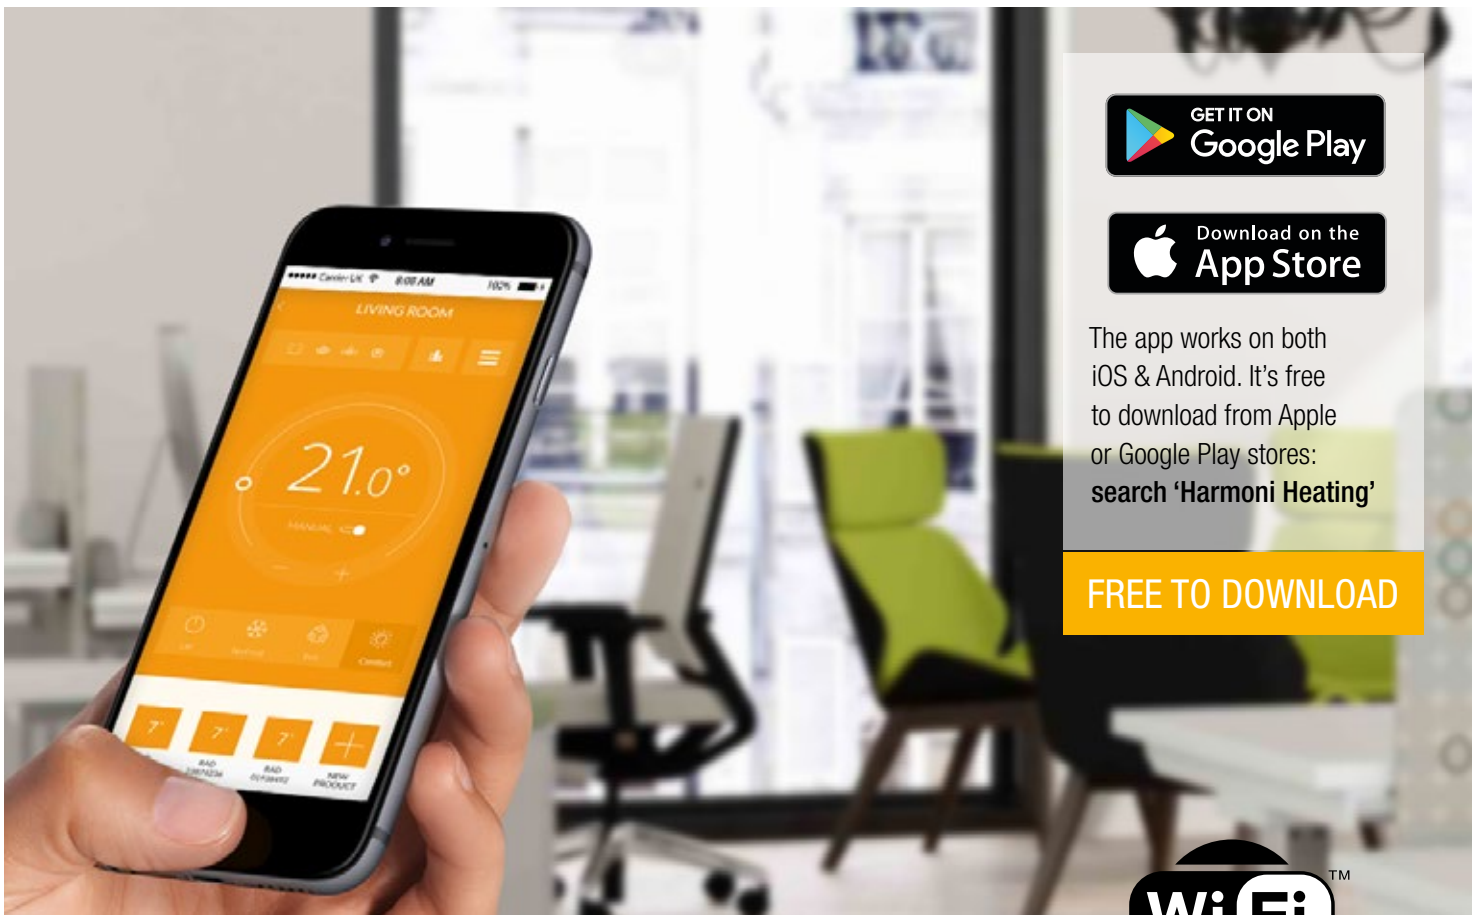

SAVE MONEY

ICynene® spray foam insulation is a premium product that really pays for itself, helping you save on heating and cooling costs by providing U-value insulation and air sealing.

Spray foam insulation is an investment that can create an air barrier and minimize air leaks, reduce energy bills and potentially increase the value of your home.

You could also reduce the size of your heating and cooling equipment, saving on installation and replacements costs.
